	In the HMH Into Reading program for 2nd grade, students develop key reading and writing skills. They learn phonics to decode words and build vocabulary, improving their ability to read fluently and with expression. Comprehension strategies help them understand stories and informational texts, while phonemic awareness activities enhance their ability to recognize and manipulate sounds. In writing, students practice composing narratives, informative texts, and opinion pieces, following the writing process from brainstorming to publishing. They also learn grammar, punctuation, and sentence structure to create clear, coherent writing. Collaborative activities and peer reviews further support their growth as confident readers and writers.
